

Simulador de Investimentos em Fundos Imobiliários (FIIs)

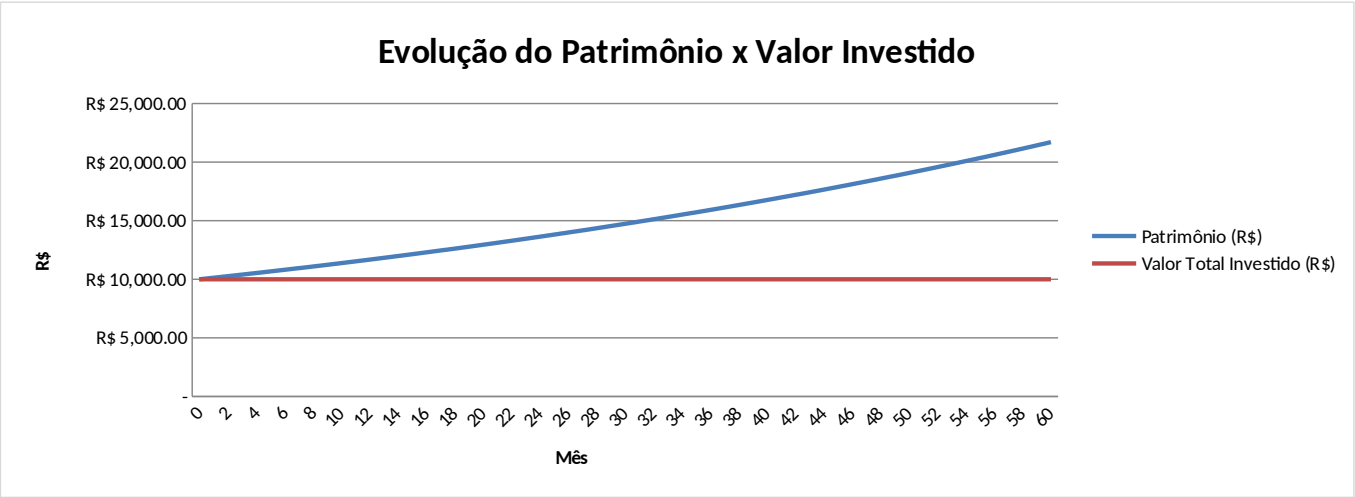

Preencha apenas as células amarelas (B5:B9). O restante é calculado automaticamente.

Valor do aporte inicial (R\$)	R\$ 10,000.00	Valor investido uma única vez no mês 0. Exemplo: R\$ 10.000,00.
Preço da cota no mês 0 (R\$)	R\$ 100.00	Cotação do FII na data do investimento. Exemplo: R\$ 100,00.
Valorização mensal esperada da cota (%)	0.50%	Taxa média de valorização (ou desvalorização, se negativa) da cota ao mês. Exemplo: 0,50%.
Dividend yield mensal esperado (%)	0.80%	Percentual pago de dividendo sobre o preço da cota do mês anterior. Exemplo: 0,80%.
Número de meses da simulação	60	Quantidade de meses a projetar (máx. 60 nesta planilha).

Método da simulação

Aporte único no mês 0, sem novos aportes externos. Todos os dividendos recebidos são reinvestidos automaticamente na compra de novas cotas, ao preço vigente no mês. O retorno considera valorização da cota + dividendos reinvestidos.

Resumo dos Resultados	
Valor total investido (R\$)	R\$ 10,000.00
Patrimônio acumulado ao final (R\$)	R\$ 21,705.35
Total de dividendos recebidos (R\$)	R\$ 7,203.29
Rentabilidade total (%)	117.05%
Nº de cotas ao final	160.9174
